Zoning

This map simplifies city zoning into three categories:

- Residential (Green)
- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

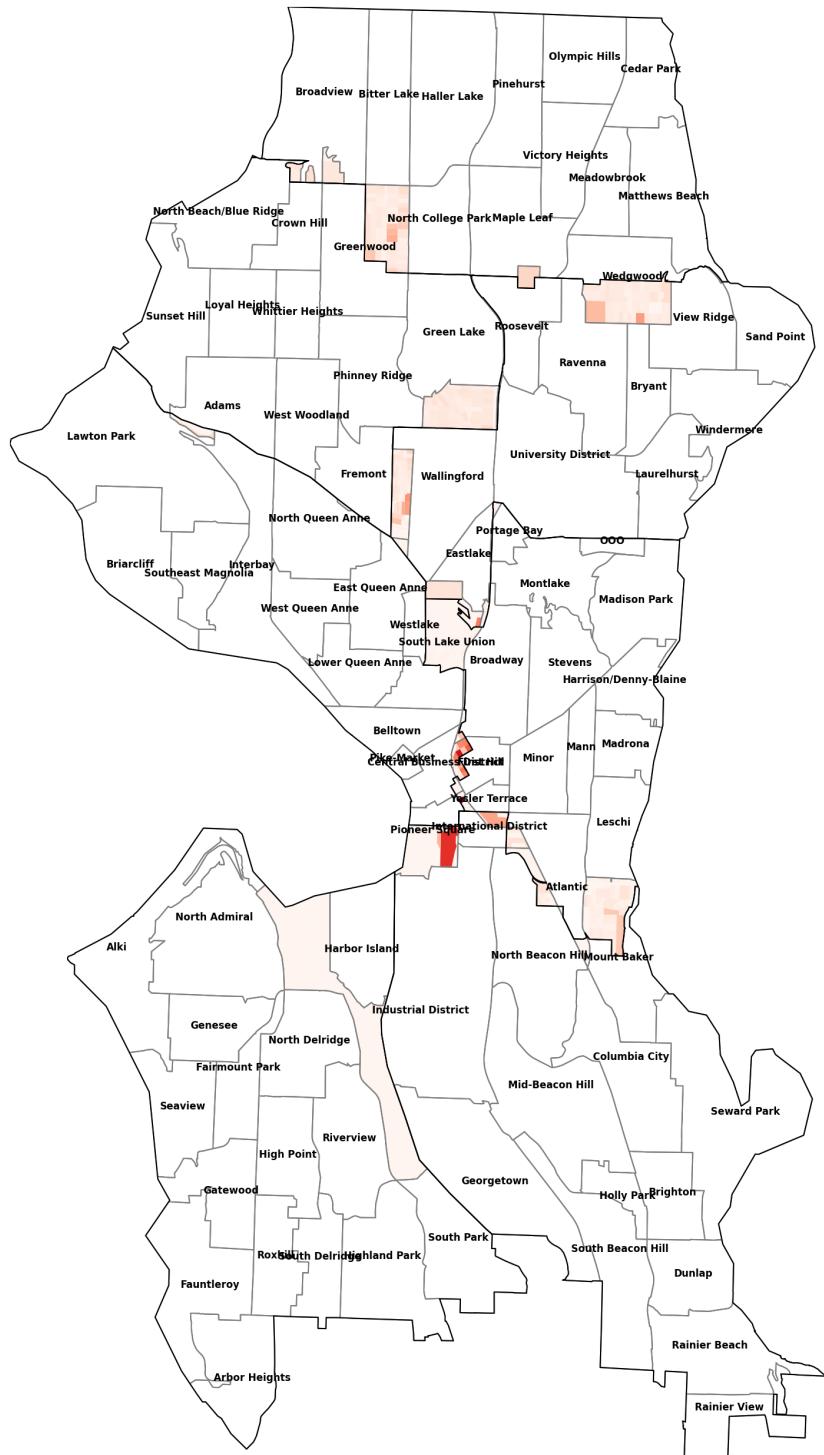

Driving Connectivity

This map *fails* because some districts (4, 5) have disconnected road networks. This means some folks would have to drive through another district to get to another place in their district.District 5 Driving connectivity map showing 2 partitions for district 5

District 6 Driving connectivity map showing 2 partitions for district 6

City Clerk Neighborhoods

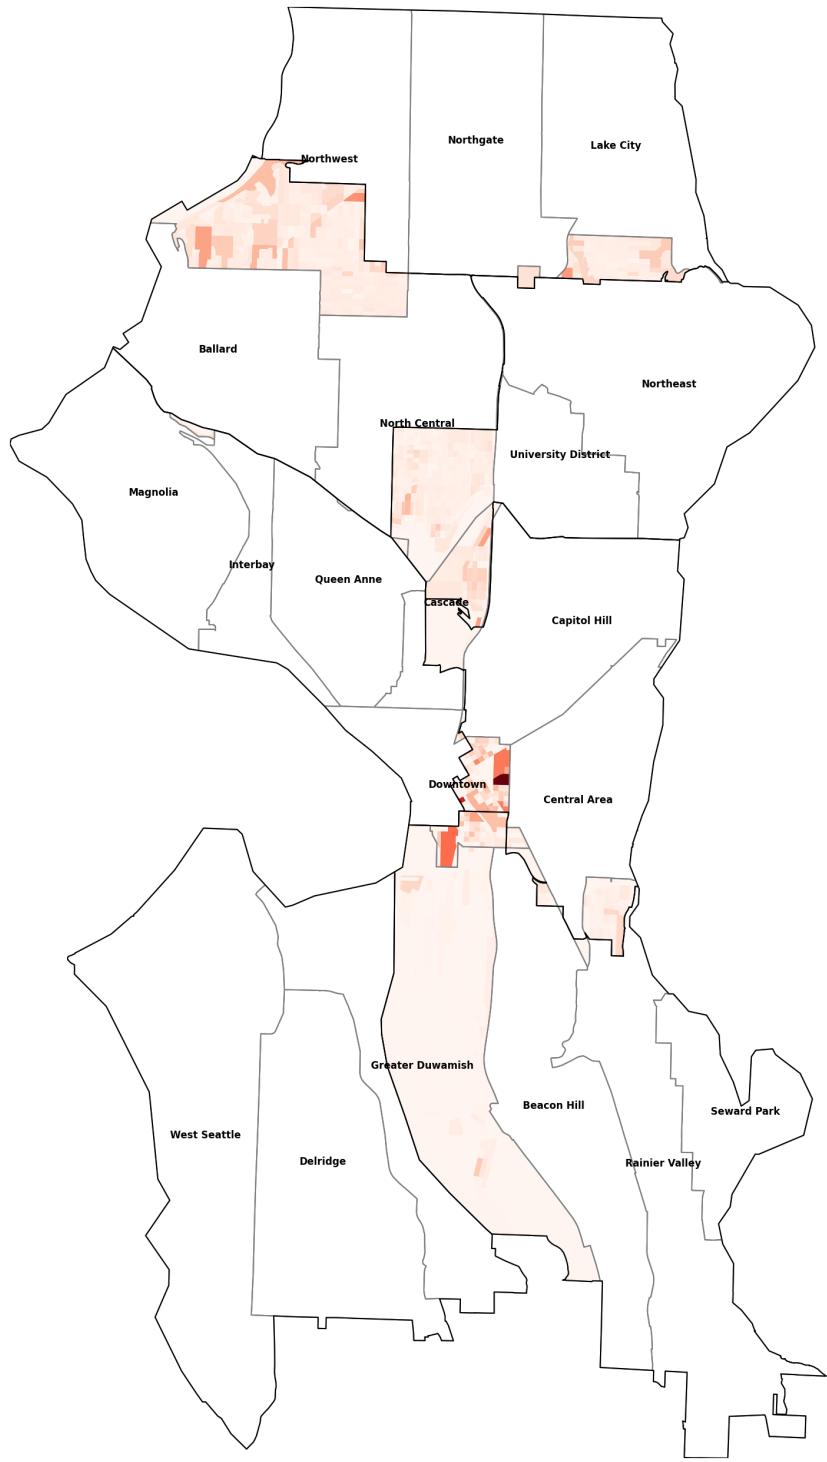

This districting splits 19 out of 91 areas. A person was split from an area 31044 times.

Zoning

This map simplifies city zoning into three categories:

- Residential (Green)

- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

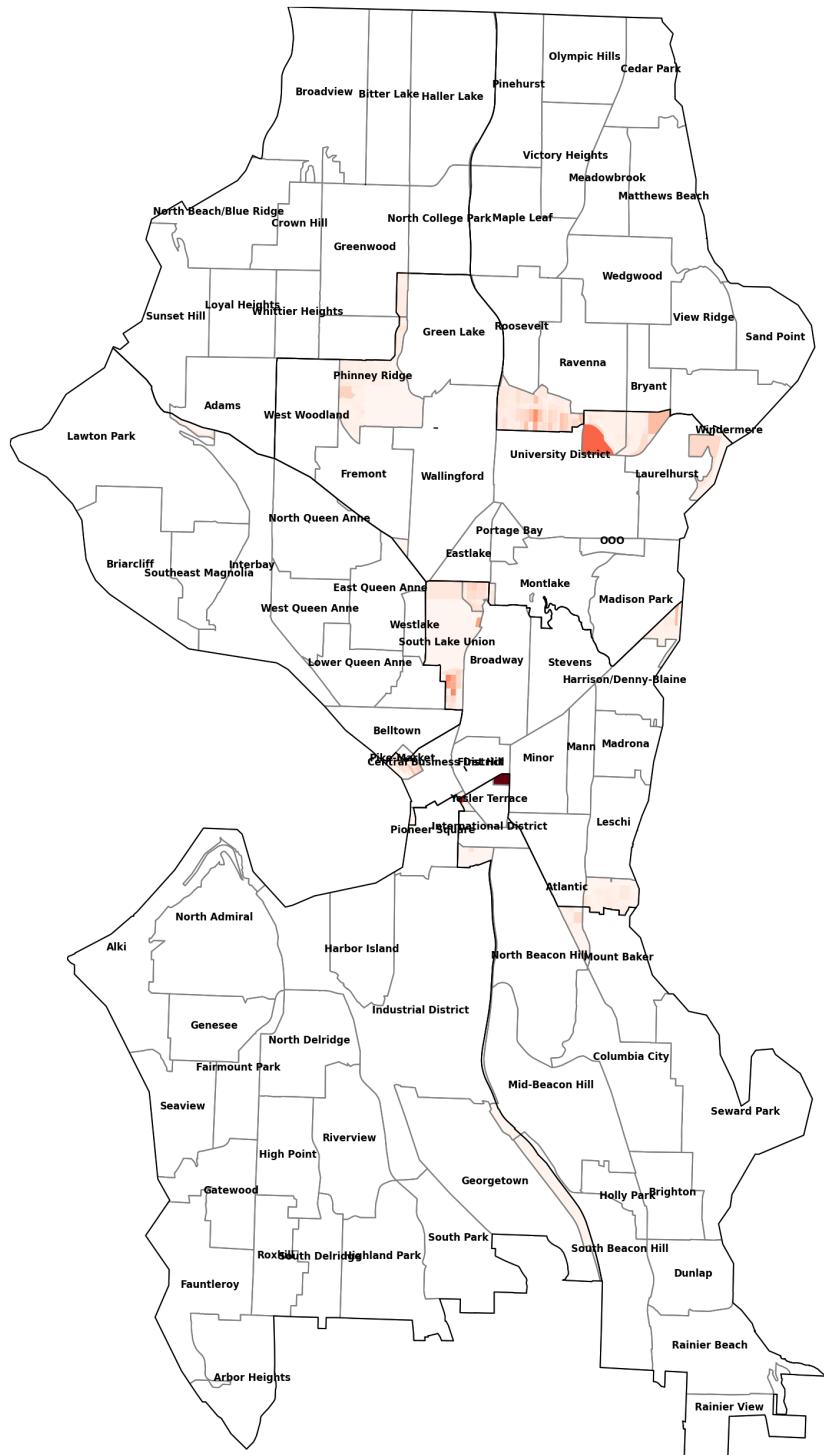

Driving Connectivity

This map *fails* because some districts (4) have disconnected road networks. This means some folks would have to drive through another district to get to another place in their district.District 5 Driving connectivity map showing 2 partitions for district 5

Zoning

This map simplifies city zoning into three categories:

- Residential (Green)
- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

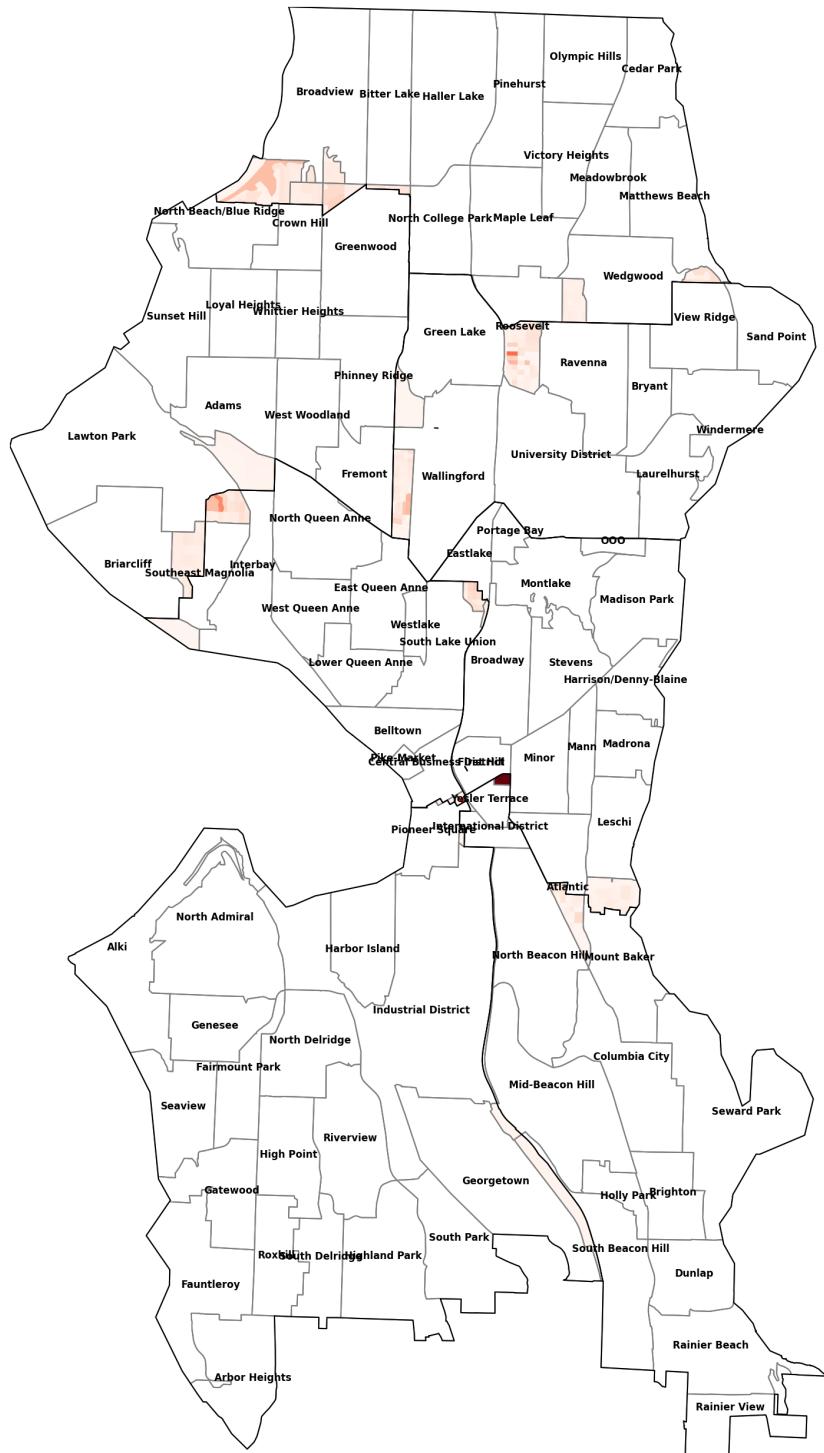

Driving Connectivity

This map *passes* because all districts are connected. Meaning you can drive to anywhere in each district without leaving it.

City Clerk Neighborhoods

Zoning

This map simplifies city zoning into three categories:

- Residential (Green)
- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

Driving Connectivity

This map *passes* because all districts are connected. Meaning you can drive to anywhere in each district without leaving it.

City Clerk Neighborhoods

This districting splits 19 out of 91 areas. A person was split from an area 20822 times.

Zoning

This map simplifies city zoning into three categories:

- Residential (Green)
- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

Driving Connectivity

This map *passes* because all districts are connected. Meaning you can drive to anywhere in each district without leaving it.

City Clerk Neighborhoods

This districting splits 20 out of 91 areas. A person was split from an area 12969 times.

Zoning

This map simplifies city zoning into three categories:

- Residential (Green)
- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

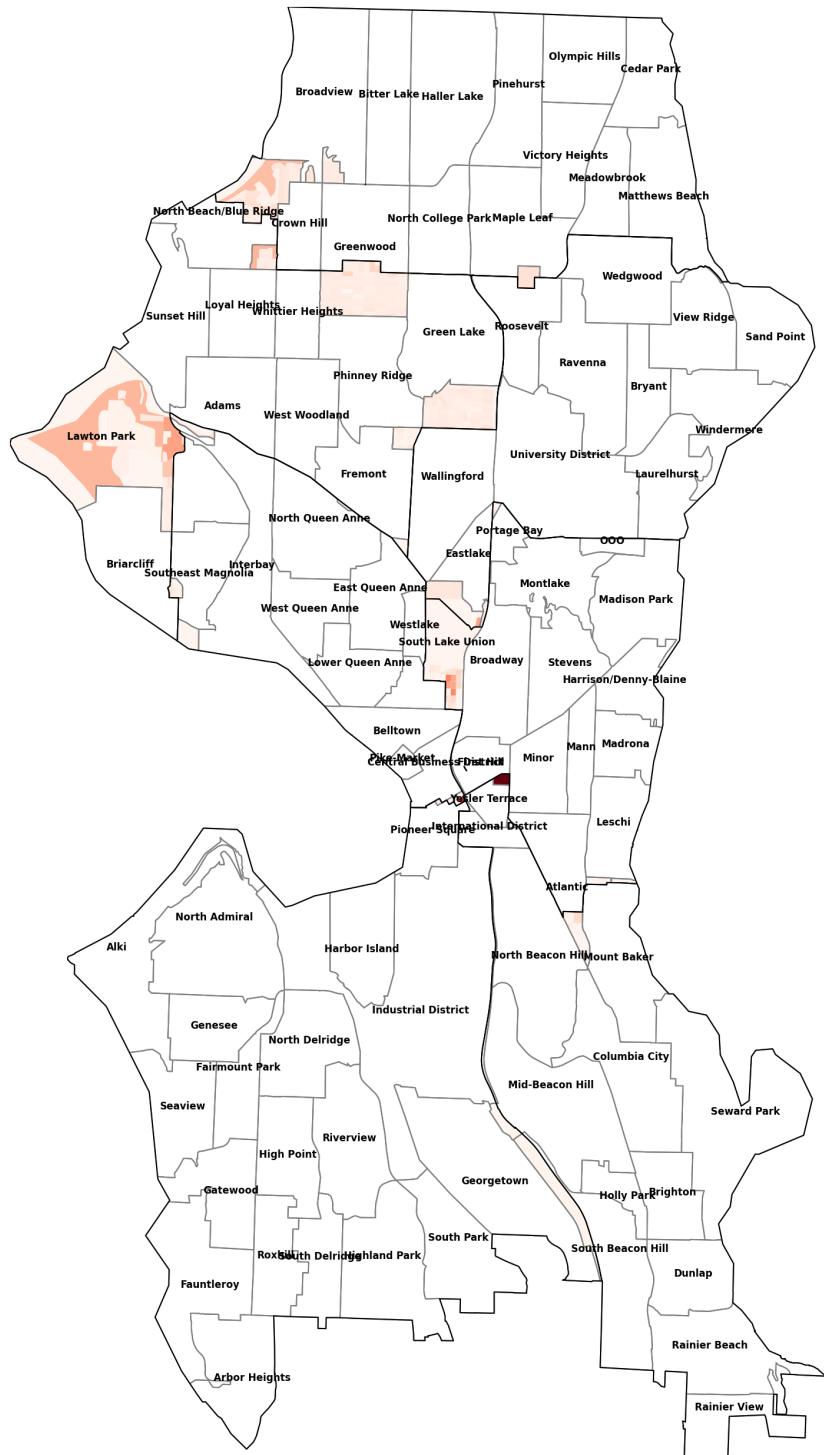

Driving Connectivity

This map *fails* because some districts (6) have disconnected road networks. This means some folks would have to drive through another district to get to another place in their district.District 7 Driving connectivity map showing 2 partitions for district 7

Zoning

This map simplifies city zoning into three categories:

- Residential (Green)
- Commercial (Blue) and Residential is also allowed
- Industrial (Yellow)

Denser areas are darker than lighter ones. There are three gradations of density.

Driving Connectivity

This map *passes* because all districts are connected. Meaning you can drive to anywhere in each district without leaving it.

City Clerk Neighborhoods

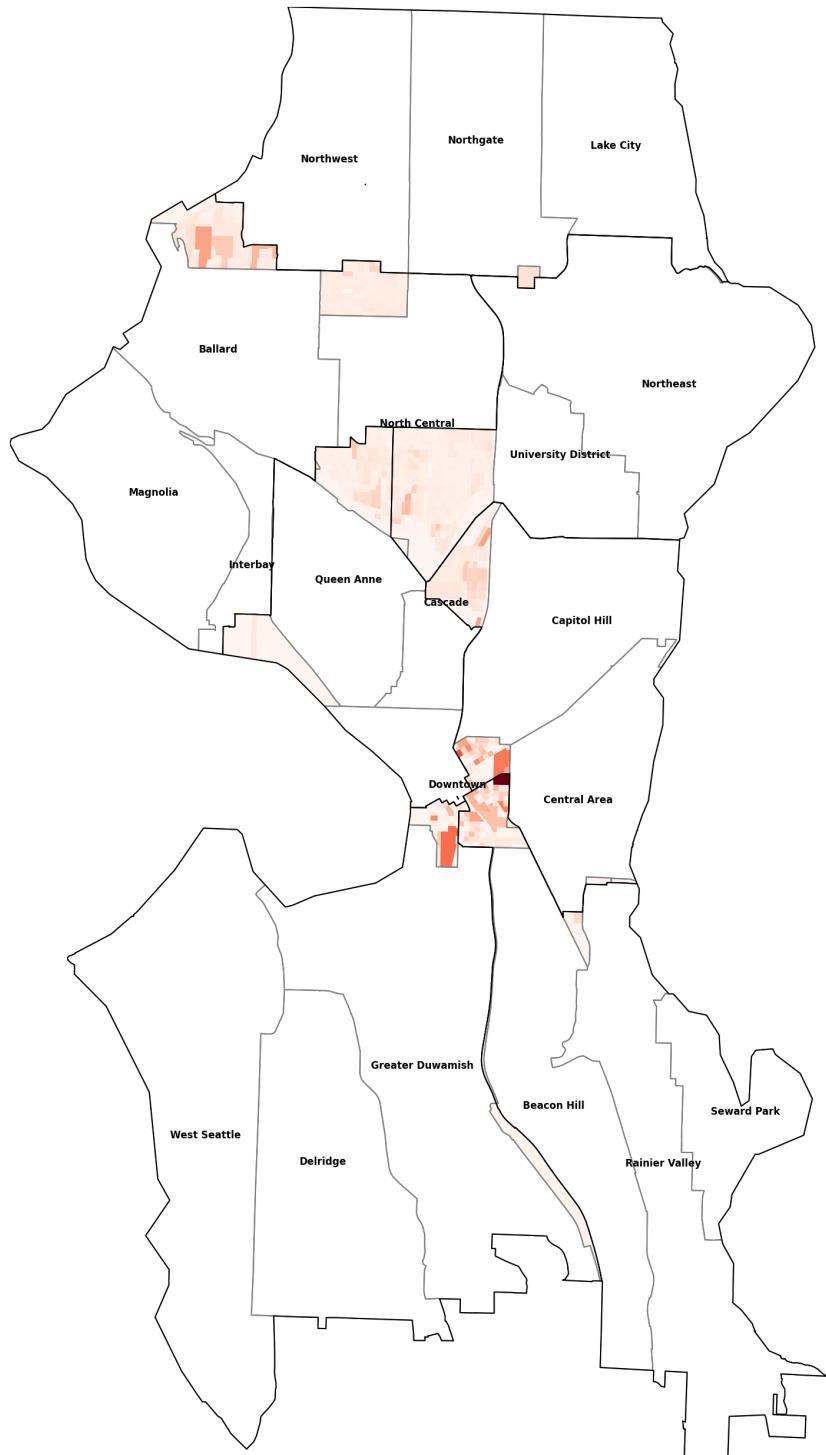

This districting splits 15 out of 91 areas. A person was split from an area 26950 times.
